- Programming foundations with JavaScript, HTML, CSS. (Coursera - 2024)
- Applied Data Science with Python. (Coursera - 2024)
- Applied Machine Learning in Python. (Coursera - 2024)

RELATED EXPERIENCE

IBM – Milan
Advance Robotics

- Two-week internship: during the first week, I received comprehensive training on the history of IBM and the world of computers; in the second week, I worked on an advanced robotics project in a team using Node.js. Through this experience, I gained an appreciation for the pleasure and passion of working in the field of computer science and overcame my fear of speaking in front of an audience.
