PROFILE

Data consultant at SDG Group, promoted from Data Analyst to Consultant in 18 months. Two years of SAP data and analytics work (S/4HANA, ECC, HANA, BW, Datasphere, BusinessObjects) for fashion, eyewear and industrial clients, including an English-language international project. Now building cloud data platforms on AWS for Ducati. BSc Computer Engineering, Politecnico di Milano. English C1. Building toward data and performance roles in motorsport.

EXPERIENCE

SDG Group Italy — Milan · Sep 2024 – present
Consultant — Mar 2026 – present
Data Analyst — Sep 2024 – Mar 2026

PROJECT STREAMS

- **Ducati — cloud data platform (AWS).** Onboard SAP ECC tables and Excel sources onto an AWS data platform (S3, Glue, Iceberg): CloudFormation templates, load metadata and raw-to-curated SQL transformations.
- **Ducati — dealer data flows.** Investigate and resolve issues on SAP data sent to the dealer network, from root cause in SAP Data Services jobs and XML files to fix and reply to the user.
- **Luxottica — SAP data & analytics.** Data work across S/4HANA, ECC and HANA, with models and reporting in BW, Datasphere and BusinessObjects.
- **Satisloh — SAP data & analytics, international project run in English.** Same SAP stack, working with an international client team.
- **Shorter engagements:** Dolce & Gabbana, Sacchi Elettroforniture, Mondadori.

Day-to-day contact with client teams across all projects.

IBM — Milan · Jun 2016
Intern, high-school programme: team robotics project in Node.js.
